

Oxford Lean-To Fabric Clad

The Oxford twin hoop, trellis arch design is one of the most popular in our range of canopies. The lean-to format can be used to butt up to existing walls or over sail existing roofs and gutters without creating an additional roof valley. In Primary School outdoor play canopies, the trellis arches are used to hang sensory and tactile artwork and other decorative or informative items. The roof of the canopies are clad with a flame retardant waterproof fabric.

Warranties

Framework - 25 years
Fabric Cladding - 10 years against premature degradation

Sizes

The maximum width for the Oxford is around 7m but each canopy as fabricated to suit the clients requirements.
