

Apollo Entrance

Polycarbonate Clad

The Apollo polycarbonate entrance canopy is one of our most popular off the shelf design of polycarbonate Entrance Canopies. The Apollo is supported from 2 or more columns and is entirely freestanding. The trellis type beams give the opportunity to position the column legs further to the rear or front of the canopy cantilevering the roof out. As standard the roof is clad in solid sheet polycarbonate.

Warranties

Framework - 25 years
Polycarbonate Cladding - 10 years against discolouration through sunlight

Sizes

The maximum width for the Apollo is around 5m but each canopy as fabricated to suit the clients requirements.
